

CARE COORDINATION Reimagined.

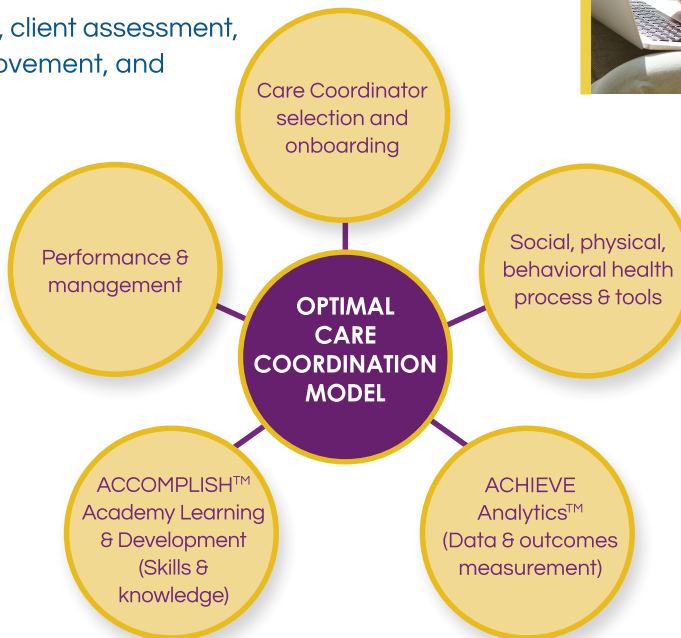

The ACCOMPLISH™ Solution

THE CHALLENGE

- 10% of the IDD population incurs a majority of the costs & a higher risk of less than optimal outcomes*
- Current case management models are not equipped to efficiently handle the growing health/financial risk of complex care individuals

THE ACCOMPLISH™ SOLUTION

- An innovative care coordination model for early identification & management of health risks in the population of individuals with intellectual, developmental, behavioral, medical, or complex care challenges
- A solution that improves health outcomes and reduces high-cost medical care like ER visits, hospitalizations and medication use
- A holistic approach that optimizes resources by proactively and simultaneously addressing mental/behavioral, medical/physical, and social/daily living health issues
- A systematized process for staffing, training, client assessment, triage & management, data analytics, improvement, and quality assurance

Because everyone deserves a meaningful life®
