

ACHIEVE

Analytics®

Assessing Consumer Health Improvement to Ensure Value & Excellence

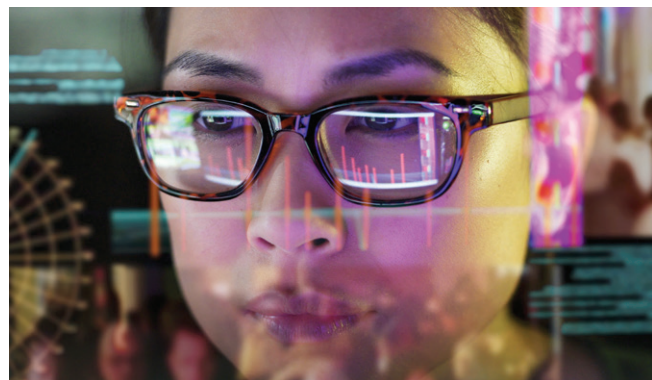

PREDICTIVE, PREVENTIVE, PERSON-CENTERED

The ACHIEVE Analytics® platform is a state-of-the-art innovation designed to support an individual's person-centered plan. By capturing real-time data on an individual's social, behavioral, and medical status, the Care Coordinator can quickly identify areas of risk before they negatively impact health, happiness, or safety.

THE POWER OF DATA TO IMPROVE OUTCOMES

Modeled on a holistic approach to person-centered care coordination, this adaptive analytics tool is a customized instrument specifically for individuals living with intellectual/developmental disabilities, behavioral health concerns or complex care needs. ACHIEVE Analytics® captures data for 16 medical and SDOH (Social Determinants of Health) categories, enabling Care Coordinators to monitor progress, mitigate health and safety risks, optimize resources, and ensure every individual can achieve their own meaningful life goals.
